All Tracks — Call for Submissions SPLC 2018

General Chairs

Jan Bosch
Dan Hao

Research Track Chairs

Thorsten Berger
Paulo Borba

Industrial Track Chairs

Götz Botterweck
Tommi Männistö

Conference Chair

Gul Calikli

Workshop Chairs

Jabier Martinez
Christoph Seidl

Demo/Tool Chairs

Philippe Collet
Jianmei Guo

Challenge Track Chairs

Timo Kehr
Sarah Nadi

Journal First Chair

David Benavides

Tutorials Chairs

Christoph Elsner
Rick Rabiser

Doc. Symp. Chairs

Oscar Díaz
Julia Rubin

Panels Chair

Rafael Capilla

The Systems and Software Product Line Conference (SPLC) is a premier forum where researchers, practitioners, and educators can present and discuss the most recent ideas, trends, experiences, and challenges in the area of software and system product lines engineering. Conference events include opportunities to hear industry leaders' real-world experiences and researchers' latest ideas, and to learn from both. For topics and submission details, see: www.splc2018.net

Research Papers (Abstract/Paper Submission Deadline: March 16/23, 2018)

We invite high-quality submissions describing original results of conceptual, theoretical, empirical, and experimental research. The papers in this category must rely on theoretical and/or empirical evaluation.

Industrial Systems And Software Product Lines Track (Deadlines as above)

We seek contributions from industry that share their challenges, successes, and adaptations of existing practices in all stages of maturity. We explicitly encourage papers reporting on applications of product line concepts in emerging domains and of novel concepts in a product line context.

Challenge Track (Submission Deadline for Cases/Solutions: January 12/May 25, 2018)

In phase 1, we invite submissions of case studies that tackle relevant product line problems and challenge the state of the art. A case description can be (1) a particular data set with specific questions or (2) a call for a solution to a particular problem in a given context. Call for solutions to the accepted case studies will be released in phase 2.

Journal-First Track (Submission Deadline: May 23, 2018)

Journal first track seeks to include already published journal papers in the SPLC 2018 program. Authors of published papers in high quality journals will be invited to send a proposal to present their work at SPLC 2018. Also, authors can submit their proposals by their own.

Workshop Proposals (Workshop Proposal Deadline: February 15, 2018)

We invite submissions of proposals for one-/two-day workshops in the field of software product lines. In particular, workshops on challenging, emerging areas related to the conference topics are sought.

Data, Demonstrations, and Tools Track (Paper Submission Deadline: April 10, 2018)

We invite submissions of either product-line tools, of substantial datasets to be shared with the community, and of practices tackling current industrial challenges.

Doctoral Symposium (Submission Deadline: April 10, 2018)

We invite submissions of students who are at least in their second year of PhD. The submissions should cover (1) the research problem being addressed, (2) the expected research contribution, (3) research methodology and evaluation plan, (4) a description of the results achieved so far, and (5) a planned timeline for completion.

Tutorials (Submission Deadline: May 16, 2018)

Tutorials may focus on introductory product line topics, such as how to introduce a product line approach into an organization, or on advanced tools, approaches, methods, and best practices.
